

Always A Bigger Ship

Game Identity / Mantra:

A 2D top down arcade shooter about spaceships battling and plundering each other for parts, with the goal of becoming the strongest ship around

Design Pillars:

Fast
Always Growing
Rogue Like

Genre/Story/Mechanics Summary:

Ships in this game are modular, where each component can be shot off and possibly reattached to the player ship, thus allowing to player to go from a junk ship to the strongest battleship around.

Features:

- Modular ships
 - Ships are a collection of block components that can be freely attached to each other
 - Multiple types of components
 - Thruster – increase travel speed and acceleration in their direction
 - Weapons
 - Auto-firing turrets
 - Special manual weapons
 - Generators – Increase available ship power
 - Hull – Protects other components
 - Partial destruction, instead of being destroyed ship components might fly off
 - Free floating components can be collected and automatically attached to a ship
- Non instant projectiles
 - Projectiles have travel time, requiring the player to lead their shots
 - Projectiles can be dodged
- Enemies
 - The same modular ship like the player
- Environmental hazards
 - Asteroids and other obstacles
- Ship editing mode
 - During the run the player may edit the placements of components
 - Player must balance their hull and firepower against available power and thruster power
- Arcade like runs

- Each run begins with the player in a junk ship and ends with the player's destruction
- Missions
 - Special tasks that give the player access to better equipment
 - Pirate missions – gain a specific component out of an enemy ship
 - Defense Mission – Defend a friendly ship from a swarm of enemies
 - Courier mission – go to another place quickly

Interface:

- Movement – Forward and backward thrust (WS), turning (AD)
- Player can choose automatic placements mode (Mouse on UI or R)
- Ship editing done by drag and dropping with mouse
- Special Weapons can be binded to number keys
- Turrets can be manually targeted using the mouse

Art Style:

Gritty utilitarian sci-fi
